Office Action Summary

OFFICE ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a calibration pad apparatus, classified in class 414, subclass 416.01.
 - II. Claims 10-14, drawn to a method for calibrating a robot arm, classified in class 414, subclass 800.
2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process can be practice either manually or by proximity switches, direct contact switch, radiant detectors etc., the apparatus can be used as safety detector in a security environment.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raymond Johnson whose telephone number is (703)
